A LOOK BACK

I left college at Gulf Coast State in Florida where I was majoring in Cyber Security to move up north in pursuit of software development. Even though I've faced some discrimination for being young, I've only seen those interactions as incentive to grow, and that's why one of my passions is Team Building. I'm an ex World Class Drummer and the years of teamwork engrained into my mind hold strong in my day-to-day development cycle. I look towards the future with excitement in building the next greatest tool.

WORK EXPERIENCE

FRONT END JAVASCRIPT ENGINEER

QOMPLX | Aug 2017 - Ongoing 📍 Reston, Virginia

- Expanded upon my stack by specializing in Front End utilizing current trend technologies such as Vue and breaking into Scala to build Machine Learning powered software for top name companies in tech.
- Collaborated on a wide breadth of teams within the company including our Cyber Security, Financial Tech, and Insurance platforms.
- Scaled and maintained 5+ platforms with ongoing stack optimizations, such as transitions from AngularJS to Vue.
- Overhauled the public facing website
- Curated personalized products for various customers.
- Built standards and frameworks to help the team grow.

JUNIOR FULLSTACK ENGINEER

TargetDocs | Feb 2017 - Aug 2017 📍 Washington D.C.

- Working as the lead developer I implemented new architecture for the product to become competitive and scalable enterprise software.
- Integrated back-end features using Ruby on Rails and AngularJS
- Lead demos and QA with customers to integrate their feedback.

ASSISTANT TEACHER

NYC+DA | Feb 2017 - Aug 2017 📍 Washington D.C.

- Part time teacher for the Web Development Intensive program.

ACADEMIC PROFILE

UDEMY

JavaScript Algorithms and Data Structures Certificate Course

- July 2019
- Exercised and mastered Sorting Algorithms and Data-Structures which are common in JavaScript

NEW YORK CODE + DESIGN ACADEMY

Certificate of FullStack Web Development

- November 2016 - February 2017
